

# 23 READING PRACTICE

Every time we eat we **0)**...**use**... our teeth. Teeth help us to break our food into small pieces. **1)**..... are three different kinds of teeth: 'incisors', 'molars' and 'canines'. **2)**..... kind has a different job. The incisors are the teeth **3)**..... the front of the mouth. We need them to cut our food.

The molars are **4)**..... biggest teeth in our mouths. Between the incisors and the molars we have the canines. They are longer **5)**..... the other teeth.

Children's first teeth are **6)**..... 'milk teeth'. Children usually have twenty milk teeth and they have **7)**..... of them when they are about two years old.

When children are seven or eight years old they start to **8)**..... new teeth. Grown ups have thirty-two teeth. It is very important for us to look **9)**..... our teeth. We should **10)**..... them with a toothbrush after every meal and it is good to go to the dentist every six months.
